

Final Project- Promineo Tech

I created this project based on a type of equipment my company sells, confined space. I altered the names, addresses, and companies slightly since we are a publicly traded company and I didn't want to cross the line with actual sales data.

The image shows the Swagger UI for the 'Confined Space Customer Service' API. The interface includes a Swagger logo, a version selector set to 'v3/api-docs', and an 'Explore' button. The API title 'Confined Space Customer Service' is displayed with a link to the API docs. A 'Servers' section shows the base URL 'http://localhost:8080 - Local server'. The API is organized into three controller sections: 'default-vendor-controller', 'default-sales-person-controller', and 'default-orders-controller'. Each controller lists five endpoints with their HTTP methods, paths, and descriptions.

Controller	Method	Path	Description
default-vendor-controller	PUT	/vendor/updateVendor	Updates a vendor
	POST	/vendor/createVendor	Creates a new vendor
	GET	/vendor/getsVendorByName	Returns a list of vendors by name
	GET	/vendor/getsAllVendors	Returns a list of vendors
	DELETE	/vendor/deleteVendor	Deletes a vendor
default-sales-person-controller	PUT	/salesPerson/updateSalesPerson	Updates a sales person
	POST	/salesPerson/createSalesPerson	Creates a new sales person
	GET	/salesPerson/getsSalesPersonById	Returns a list of sales person by Id
	GET	/salesPerson/getsAllSalesPerson	Returns a list of sales people
	DELETE	/salesPerson/deleteSalesPerson	Deletes a sales person
default-orders-controller	PUT	/orders/updateOrder	Updates an order
	POST	/orders/createOrder	Creates a new order
	GET	/orders/getsOrderByCustomerId	Returns a list of orders by Customer Id
	GET	/orders/getsAllOrders	Returns a list of all orders
	DELETE	/orders/deleteOrder	Deletes an order

default-customer-controller

PUT	/customer/updateCustomer	Updates a customer
POST	/customer/createCustomer	Creates a new customer
GET	/customer/getsCustomers	Returns a list of customers
GET	/customer/getsCustomerByName	Returns a list of customer by name
DELETE	/customer/deleteCustomer	Deletes a customer

default-equipment-orders-controller

GET	/equipmentOrders/getsAllEquipmentOrders	Returns a list of all equipment orders
-----	---	--

default-equipment-controller

GET	/Equipment/getsAllEquipment	Returns a list of equipment
-----	-----------------------------	-----------------------------
